Message of the General Manager of ABplus Events

"We value Design. Design is about creating places that enhance the human experience. Before we imagine, we interact.

GIS International Architecture Expo Conference presents best practice examples, widely imaginative projects from the following domains: education & culture, healthcare architecture, hospitality architecture, office & public buildings.

The series of the international GIS expo conferences organized in 2016 in Hungary, Poland and Romania is addressed to architects, interior designers, lighting designers, contractors, investors and companies from the industry.

GIS 2016 editions highlight the design of buildings that generate new thinking in social, cultural, learning & working environments.

We believe in a sense of place and the development of sustainable communities, an approach to design that considers and responds carefully to local cultures, lifestyle patterns and architectural languages both internationally and nationally.

Designers and architects never lose sight of the people who use their buildings, the communities they serve and the legacy they leave. Design and sustainability are inseparable and as such the focus is on reducing the gap between design and real life performance."

The guest speakers in the program of our GIS international expo conferences are the industry’s most florin mindirigiu

Co-Founder and CEO ABplus Events
GIS International Interior Architecture and Design Expo Conference is the right place to meet architecture and design community to celebrate learn, exchange and be inspired! At GIS we have very interesting talks about Architecture and Interior Design and start to see where we’re going to be in the future. It’s that dialogue face to face, with people that are doing amazing things that makes GIS one of the most important events that happens in architecture each year.

It has been amazing to be part of the GIS Conference and look across the range and quality of projects put forward for this event. GIS is part of my heart since the Bucharest and Warsaw edition and I really believe that this amazing experience in Budapest will blow your mind.

Special Guest GIS Budapest 2016 edition

On behalf of the Association of Polish Architects SARP, partner of GIS expo conference, I have the honour and great pleasure to welcome you, and our guests, architects, interior architects and designers, who represent well-known European architectural studios, among the winners of competitions and awards and the authors of outstanding works in the field of interior design.

I hope that unlimited imagination combined with technological progress will offer great opportunities to all interior architects to create user-friendly spaces, which respond to the client’s needs.

arch. Mariusz ŚCISŁO
President of THE ASSOCIATION OF THE POLISH ARCHITECTS SARP
Chairman GIS Warsaw 2014

It was a very good combination of fresh designers who are somewhere at the beginning or in full swing of their career and who allow us, in fact, to anticipate the future. What pleased me very much was that the public had the opportunity to see what it means to put in the effort to produce quality interiors, as the speakers presented their projects behind the scenes, where we saw huge labour, which one must be both driven and subtle to understand when decoding the result.

Another thing that I find important is that this conference highlights the exceptions and things that can be inspiring, models to follow. The world does not know them, does not see them and this justifies the public’s appetite for this conference. A great benefit is also its educational role.

President of THE ORDER OF THE ARCHITECTS OF ROMANIA
Co-organizer of the Romanian editions of GIS
The series of GIS events was extraordinary, with an incredible number of very very interesting people, architects, interior designers. The event has allowed me to meet new people and has offered me the opportunity to meet people that I normally wouldn’t have had the chance to meet and network with, this is what I think is really important. In Los Angeles we have a really rare opportunity to do this and as it is so far away, allowing me to come to this was absolutely extraordinary, this is something I wouldn’t have been able to do. I found the event to be fantastic and since my return to Los Angeles I have been telling everybody about it and I really recommend to other architects from the United States of America to participate.

It is always great when a lot of people from different countries meet, GIS gave us the great opportunity to have inside-outside debates & presentations. It is always nice to meet people and I am glad I have participated at the GIS expo conference.

Testimonials

“I think GIS is a fantastic event and amazing opportunity. It is so important to bring together people with this inspiration and connect them. Everybody presents his point of view and that is why the event is very inspiring and I really can recommend it, absolutely.”

Guest Speaker GIS Warsaw 2015 & GIS Bucharest 2011

“It was great that I was part of this great influential and inspirational talks, the most exciting part was that there were designers all over the world and what was really nice is that, whatever the country they were coming from was, they all came to a single conclusion. I once more came to the idea that design is an international language and I am very hopeful about the future now.”
